NEW WHITEPAPER

AI Solves Common Health Care Financial Ills

Artificial Intelligence can be a powerful tool for good when it comes to health care. It can help solve serious problems like rising medical costs, which put care out of reach for many individuals. Specifically, AI in new electronic health record technology like our Axiom EHR **solves some of the most common problems in revenue cycle management**. Learn more about the six problems that AI can address in newer EHR systems.

FEATURED BLOG

UX + AI = Productivity

An EHR system designed to help health care professionals work smarter, not harder can do more than just manage patient data. When an EHR is **powered by advanced technology and designed with usability in mind**, it can help reduce the need for data input and alleviate some of the factors that cause provider burnout.

HiMS IN THE NEWS

For Many Providers, It Pays to Outsource RCM

Nothing can be done about soaring health care costs if providers are not paid for their work. Here are 8 reasons why **outsourcing your RCM is smart**.

MAKING THE ROUNDS

HiMS on the Road

It has been exciting to see so many of you around the country this summer! In the past couple of months, our travels have taken us to Los Angeles, Salt Lake City, New Orleans, Long Beach and Orlando. And **we're not slowing down!** Next stop: the ESI Management Group Fall Conference on Substance Abuse Disorders in St. George, Utah, and the Open Minds Executive Leadership Retreat in Gettysburg, Penn.! Stop by and see us to learn more about how our award-winning Axiom EHR software is a game-changer for integrated behavioral health.

ANNOUNCEMENT

Welcome to Our New Customers!

HiMS is proud to welcome two new customers aboard! We are exceedingly grateful for the opportunity to partner with both as we kick off the best-practice Axiom software implementation phase.

Valley Behavioral Health has successfully helped thousands of adults, children, and families over the past 30 years in Salt Lake City, Utah with individualized therapy, mental health services and personalized treatment. The organization wanted an advanced, more updated EHR software to aid in their mission of helping those they serve live more fulfilling lives, one person at a time. HiMS appreciates the trust you put in our Axiom software to improve operational, financial, and clinical efficiencies and enhance patient outcomes.

Open Hearts Family Wellness's mission of growing hope for individuals and families in Phoenix, Arizona required an EHR upgrade. "Using our old EHR system was like farming with a horse and buggy," remarked one Open Hearts staff member on the Axiom EHR selection committee. "Using Axiom is like farming with tractors." HiMS is excited to work in tandem with the Open Hearts team to cultivate fertile ground for agency growth using the best in AI-assisted technology. Welcome to the HiMS family!
