Axiom Quarterly Insider
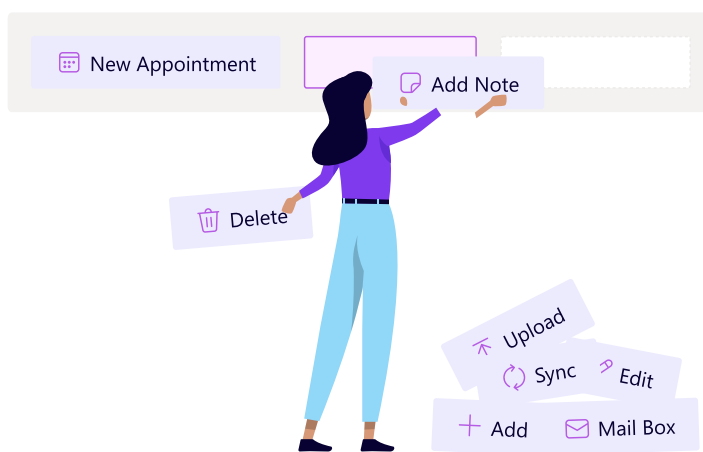

Introducing AxiomEHR
The EHR You've Always Wanted is Here!

Today, we're excited to share with you our all-new, AI-powered EHR software, AxiomEHR!

Designed specifically for behavioral and integrated health care providers, **AxiomEHR features advanced AI tools** to help you streamline inefficient workflows, reduce screen time, and optimize care delivery. In pilot tests, **AxiomEHR saved clinicians two hours a day on average** compared to other solutions – with AxiomEHR, you can focus on treating patients to "Do More Good."

Here's What Makes AxiomEHR so Innovative:

✅ **Automated workflows to capture insight.** AxiomEHR listens closely to clinicians' conversations with consenting patients and employs advanced natural language processing to capture a verbatim transcript, extract key information, and transform spoken words into structured data. It even creates service plans, schedules appointments, and schedules lab tests.

✅ **Support for back-office operations, including revenue cycle management.** The software intelligently tackles problems like under-coding, under-documentation, contract management, overbilling, missed claims appeal opportunities, and blind spots. In a pilot, billing codes were 23% more accurate and 33% more complete than the market leader.

✅ **Configuration for providers and customization for users.** With AxiomEHR, each employee can make the platform their own by arranging functions, features, and apps in the software however they like, hiding the ones they don't need, and commanding the software entirely by voice if preferred. You can access whatever you need in just one click, saving precious time.

✅ **A full suite of transformative offerings.** In addition to AxiomEHR, we offer AxiomMobile, a powerful communication app that pairs seamlessly with AxiomEHR; and Axiom Connect, a portal for patients – all proven to elevate the provider and patient experience.

Testimonials
Early Praise for AxiomEHR

Several of our customers have already tested AxiomEHR and experienced the benefits of its advanced AI-powered tools for voice recognition, note taking, decision making, and more.

Here's What They Have to Say:

"**AxiomEHR stands out among other EHRs**, leading the charge in functionality and quality-based care. The future of health care includes AI, and AxiomEHR is on the forefront of innovation and process improvement."
– Jeff Oakes, CEO, ChangePoint

"The AI technology found in AxiomEHR allowed us to reduce our documentation burden with the software's intelligent automation. **AxiomEHR is an embodiment of the best core functionality** needed to compete and succeed in the world of quality-based care."
– Rod Cook, CEO, COPE Community Services

"AI is the future of integrated health care. **AxiomEHR's functionality brings innovation to our care delivery, enabling organizational scalability and service delivery flexibility.**"
– Bob Sanowski, Vice President of Information Technology, Southwest Behavioral and Health Services

Founder Spotlight
Meet the Innovator Behind AxiomEHR

Khalid Al-Maskari is the founder and CEO of HiMS, **but did you know that he's also the developer of our EHR software?**

Here's What Drove Him to Create AxiomEHR – in His Own Words:

"It has always been a passion of mine to transform the integrated health care experience using technology. I was CIO of a large integrated health care agency before starting HiMS in 2014. The organization provided services to individuals requiring general mental health and substance abuse issues, serious mental illness, physical health care and wellness services. The software that this company used at the time was not a good fit for what we needed from a functionality standpoint.
