INTRODUCING AXIAGRAM

Health Information Management Systems (HiMS) is very excited to announce the launch of AxiaGram, a powerful all-in-one mobile communication app that can seamlessly work with any existing Electronic Health Record (EHR) platform. The AxiaGram app places all the capabilities of an EHR in the palm of your hand – allowing health care professionals to be better connected, which ultimately leads to better care.

Learn how you can transform your practice today and read our press release here.

HIMS WEBSITE ENHANCEMENT: SERVICES PAGE

Late last year, we announced the launch of the new HiMS website, which emphasizes a more user-friendly design so you can easily find what you need to transform your integrated health care practice. Today, we're highlighing the new Services page. Packed with useful information to help you lower costs, increase efficiency and provide high-quality integrated health care, this page features IT services, business process services and Axiom training details.

Do you want to become more productive and more profitable, while helping patients achieve better outcomes? Check out the Services page and learn about the advantages of working with HiMS today.

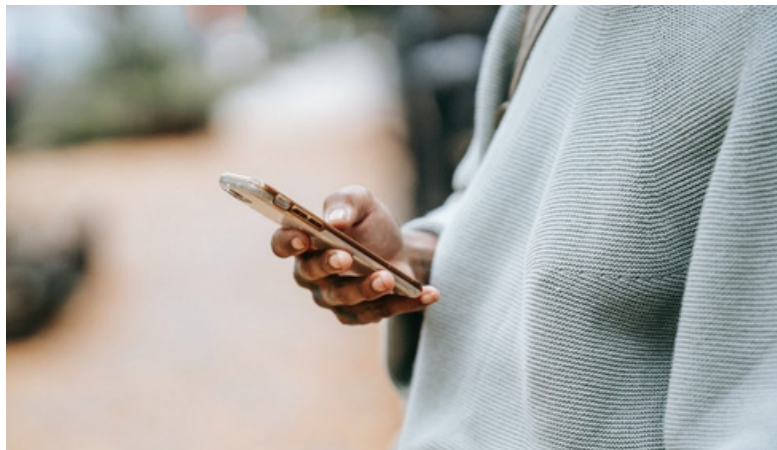

New Whitepaper: How to Eliminate Clinical Billing Burdens

With dwindling provider availability and a growing patient population, practices and clinicians find themselves bogged down. Struggles such as lagging revenue cycles, reimbursement delays, employee dissatisfaction, low staff productivity and regulatory obstacles inevitably lead to provider burnout and a poor provider-patient relationship.

Download our NEW whitepaper today and learn how your clinic can overcome billing hindrances, provider burnout and inefficiencies.

Introducing AxiaGram: an All-in-One Mobile Communication App

Mobile has always been part of the conversation at HiMS. By working closely with clinics throughout the last few years, it was very clear to us that clinical staff needed more flexibility when it came to their EHR, and the idea for AxiaGram was born. The AxiaGram app places all the capabilities of an EHR in the palm of your hand – allowing health care professionals to be better connected, which ultimately leads to better care. Read more here.

Road Trip Report: Events Impacting Behavioral Health

It's been a long time since we've been able to safely travel to conferences, and we've missed connecting with everyone in person! We're excited to be back attending events and looking forward to what's to come in 2022. For the events we've attended recently, we thought it would be useful to share our observations Read more here!

6 Benefits of using an Electronic Visit Verification (EVV) app

Physician's Practice, by Khalid Al-Maskari, December 3, 2021

Technology is disrupting and transforming the health care industry, from wearable and implantable devices to computer-assisted coding systems and interoperable electronic health records systems. For the home health industry, electronic visit verification, or EVV, has been making waves and provides several benefits to clinical operations. Read more.

HiMS announced as bronze partner for 2021-2022 OPEN MINDS Executive Institute Series

PR Newswire & OPEN MINDS, Oct. 26, 2021

OPEN MINDS has announced Health Information Management Systems (HiMS) as a bronze-level partner for the 2021-2022 OPEN MINDS Executive Institute Series. Aiming to help provider organizations leverage technology for strategic advantage, HiMS and OPEN MINDS are collaborating on a series of educational pieces focusing on data-driven decision making and interoperability in electronic health records reporting. The first of these is set to release in early 2022. Read more.

Why Behavioral Health Care Organizations Should Rethink Patient Communication

Behavioral Healthcare Executive, Sept. 3, 2021

Communication is the key to improving all aspects of behavioral health patient care and clinics. Studies show that nearly 66% of all medical errors were a result of ineffective team communication. Much has been written about how to improve internal communication across a clinic, but communication between patient and care provider is just as important to improving patient care and the overall success of a clinic. Read more.
