## CHANGES TO ORIGINAL PLAN

Summary of Change	Reason	Impact
170.315(g)(7) - 170.315(g)(9)	As of now, customers are not using these measures.	Testing was completed using production environment for test patients.

## SUMMARY OF TESTING METHODS AND KEY FINDINGS

Testing was conducted based on the selected criteria and various methods were used including production environment data and staging environment data to supplement the test. By using ONC-approved testing tools and analyzing production server log data and log files, the majority of the tests were done. Coordination with project managers to ensure testing was completed on time. The biggest challenge in these criteria is the customer and users are not actively using some of the measures. Not using the tools provided made it difficult to have consistent testing. Training and education were necessary to complete some of the test criteria.

## Care Setting(s)

The testing was conducted in the Integrated Health care setting.
