Case Study

Open Hearts Family Wellness Builds Healthy Relationships

When it was time for Phoenix-based **Open Hearts Family Wellness** to modernize its aging EHR system, the team turned to AxiomEHR.

For Open Hearts, **AxiomEHR automated workflows** to efficiently capture clinician notes and transform them into structured data. As a result, the Open Hearts team is able to significantly reduce time spent on record-keeping, and improve claims processing through structured data fields and RCM. What's more, support requests, which were previously delayed for months, are now addressed in hours, further improving Open Hearts' operational performance.

Open Hearts found love with AxiomEHR.

White Paper

How CRM Can Fix 'Follow-Up Failure'

Only 1 in 3 American patients who make emergency visits or are hospitalized for behavioral health conditions receive follow up treatment within 30 days of discharge. More **effective follow up with patients leads to better care and more revenue** for integrated health care providers. The solution? The same technology that manages interactions with prospects online: Customer Relationship Management, or CRM.

We're creating a **CRM solution specifically for behavioral health care**. Our PRM software, or prospective client management, is an integral part of our AxiomEHR software – it can close care gaps, boost patient engagement, and improve outcomes.

Integrate CRM capabilities with AxiomEHR.

Intelligent RCM Starts Patient Relationships Off Right

We believe technology can reduce red tape, errors and unpleasant surprises for everyone. Our **AxiomRCM software features automation including advanced analytics and AI** which help ensure the entire patient experience is captured correctly throughout their journey. From the start, the technology prepopulates forms, verifies identities, deduplicates records, and flags mistakes.

AxiomRCM can get you and your patients started on the right foot.
